### **Additional Information**

- Procurement Method: The owner intends to use the Construction Manager / General Contractor (CM/GC) for the construction delivery method in accordance with State policy and procedures. All delivery methods will be in accordance with State policy and procedures. This procurement process is described at the following link: [https://www.tn.gov/content/dam/tn/statearchitect/policy-&-procedures/OSA%20Policy\\_DeliveryMethods\\_4.9.2020.pdf](https://www.tn.gov/content/dam/tn/statearchitect/policy-&-procedures/OSA%20Policy_DeliveryMethods_4.9.2020.pdf)
- Programming Team: The Programming Consultant for the project, Lord Aeck Sargent, has waived rights to be awarded a contract for design and preparation of contract documents for the project but may be a part of the team to design and prepare contract documents for the project as a consultant to another firm. A consultant to Lord Aeck Sargent, in their work as Programming Consultant may be awarded the contract for the design and preparation of contract documents for the project or may serve on the team as a consultant to another firm who is awarded the design and contract document preparation contract.
- Project Schedule: The University desires to have this project ready by the Fall of 2028. They also anticipate possible multiple bid packages derived from a Construction Manager / General Contractor.
- Program Project Budget: Total Project Budget numbers as shown in the Program Document were provided to the Owner for budgetary review only. Disclosed SBC Budget is listed in the RFQ under Summary of Project and Required Designer Services.
- Additional Consultants: Specific consultants will be considered as an additional service outside of normal Basic Services for this project. The consultant's expertise should complement the awarded design firm's capabilities. The consultants should provide specific needs associated with audio visual, furniture, fixtures, and equipment, geotechnical investigation, and construction testing along with any other anticipated special consultants foreseen as specific to this project. Proposers should pay particular attention to scopes included within the bid target as broken down in the Programming Budget.

It is anticipated that these consultants may be involved during all phases of the project, as the technical input they provide can be critical to stakeholder engagement during program verification and early concept design through contract administration. It is expected that the Design Team providing Basic Services will have higher education expertise and that the specialty consultants will complement that expertise.
